

## **Lotus Notes Development and Consulting**

The core of our business is providing bespoke Lotus Notes Sydney based development services to our customers. For everyday applications, such as timesheeting, document management and project tracking, we can tailor our existing templates to your needs, ensuring that you receive the perfect fit for your business without paying for a custom application. For applications specific to your business, we will work with you to understand your business requirements and ensure that the system delivered helps you streamline your business and increase productivity.

## **Domino Support**

We can provide your company with consultancy and ongoing support services to ensure that your Domino infrastructure continues to run smoothly and efficiently. As part of this we provide:

- Domino server healthchecks
- Upgrades and hardware migrations
- Data migration to and intergration with other systems, particularly SharePoint

- Sunsetting - decommissioning of redundant infrastructure
- Access audits

Through partnerships with companies expert in their fields, we also offer:

- Application and server hosting
- Remote support
- Onsite managed services
